TOTAL COST MANAGEMENT FRAMEWORK

A Process for Applying the Skills and Knowledge of Cost Engineering

AACE'S GIFT TO YOU!

Do you know what there is to know in the field of cost management?

If you don't, you should. Don't be left out in the cold - get the most comprehensive reference tool available.

How much is it going to cost you? Absolutely nothing!

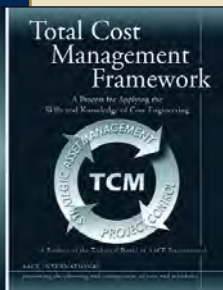

AACE's Board of Directors is offering the *TCM Framework: A Process for Applying the Skills and Knowledge of Cost Engineering* on a complimentary basis for a limited time. Get this essential reference tool by visiting www.aacei.org/tcm!

Total Cost Management (TCM) is the effective application of professional and technical expertise to plan and control resources, costs, profitability and risk. Simply stated, TCM is a systematic approach to managing cost throughout the life cycle of any enterprise, program, facility, project, product or service. The *TCM Framework* is a representation of that 'systematic approach'.

The *TCM Framework* is a structured, annotated process map that for the first time explains each practice area of the cost engineering field in the context of its relationship to the other practice areas including allied professions. As the subtitle says, it is a process for applying the skills and knowledge of cost engineering. A key feature of the *TCM Framework* is that it highlights and differentiates the main cost management application areas: project control and strategic asset management.

Get your *TCM Framework* for free today!

Visit www.aacei.org for more information on AACE International and the *TCM Framework*!

Who Is AACE?

Since 1956, AACE International has been the leading-edge professional society for cost estimators, cost engineers, schedulers project managers, and project control specialists. With more than 5,500 members worldwide, AACE is the largest organization serving the entire spectrum of cost management professionals. AACE International is industry independent, and has members in 78 countries and 71 local sections.
